

MPO MEMO

Annual Listing of Federally Obligated Projects - 2020

The MPO is required by federal law (23 CFR 450.332 - *Project selection for implementation*) to publish an annual listing of the projects that are active in our planning area that will use federal funding sources. This requirement covers all transportation projects including roads and transit. In effect, this publishing and review just reconfirms that the projects currently active in the area are those intended by the Tennessee Department of Transportation (TDOT) and/or the MPO Executive Board. This action also helps keep the public up-to-date on the projects that are in development and supported by federal funding. TDOT has not provided the annual federally obligated project list for roadways for this year. Transit information was developed in cooperation with the Jackson Transit Authority (JTA) consistent with the applicable 2020-2023 Transportation Improvement Program (TIP).

TDOT and JTA staff should be present at the meeting to help review the lists in more detail, but please let us know if you have any questions before.
